

HERMES RECORDS

Hermes Records was formed in early 2000 to produce and promote modern Iranian Music, discover creative musicians and help artists approach new musical horizons.

Lying on a great musical potential in Iran, *Hermes Records* tries to interpret different modalities and ambiences of Persian Music as well as enjoying interactions between the roots of occidental and oriental musical textures and harmonies.

While the music industry in Iran is devoting most of its attention to popular and traditional genres, artists from diverse backgrounds have been brought together in *Hermes Records* to explore common understandings and new musical colorings under our slogan "Music for Music".

Till now, the trust of well known and talented Iranian musicians as well as artists from abroad has helped us walk through this path and continue searching for new ideas.
